

## **How to Send A Ringtone To Your Cell Phone By Email**

Most cell phones allow you to add a new ringtone by sending a binary ringtone code over the Internet, either by email or through an SMS gateway.  
Here's how to do it.

***Please, before attempting this make sure that your cell phone  
Is able to receive ringtones in this way.***

*Difficulty Level: Easy    Time Required: 5 minutes*

Simply attach the ringtone file that you downloaded to an e-mail and send it to your cell phone. If you do not know your cellphone's e-mail address you will be able to find it from the list below. Once your cell phone has received your ringtone review your manual to see how to apply it as a ringtone with your specific make and model phone.

### **E-MAIL ADDRESSES FOR YOUR CELL PHONE SERVICE PROVIDER:**
